

Press Release:

CIS GmbH – The new ASME Code Inspection Agency

Essen, Germany, 24.05.2013

CIS GmbH, an inspection agency which has been operating since early 2013, offers worldwide ASME Code inspection services for the boiler and pressure vessel industry. These services, which are rendered by 24 ASME Authorized Inspectors, cover activities, ranging from preparing manufacturers for ASME Certification to design calculations of pressure vessels and piping. Assisting manufacturers with applying the ASME Code to meet the requirements of PED 97/23/EC is another key service.

Against this background 10 seminars on different ASME Code topics will be held in Berlin between 2 and 27 September 2013. The seminar series will kick off with a general overview which is followed by specialized courses regarding pressure vessels, design calculation, piping, nuclear applications, welding, NDE and PED. While the Berlin seminars will be held in German, CIS also offers other language versions.

A new offer for the German market is an “ASME NQA-1 - Nuclear Quality Assurance” seminar. The target group here are export oriented manufacturers serving the markets in North America, UAE and the Far East, where the owners frequently ask for quality assurance to be based on NQA-1.

Following the introduction of a two year publication interval, a new edition of the ASME Code is scheduled to be published in 2013. This means that the manufacturers will have to incorporate all relevant changes in their quality systems by 1 January 2014.

Among the planned changes are items such as the option to use DIN EN ISO 9712 to qualify NDE personnel, a change which will be welcome by European boiler and pressure vessel manufacturers. This improvement is just one of the many changes to be discussed during the forthcoming seminars.

Company profile:

CIS GmbH Consulting Inspection Services

Karolingerstr. 96
45141 Essen
