

Written Practice and Qualification of NDE Personnel

Description: Following a brief general introduction into the ASME Code the participants will be made familiar with the applicable ASME Construction Code NDE personnel qualification requirements.

The SNT-TC-1A guideline needed to develop and establish an employer's NDE personnel qualification system / procedure (the so called Written Practice), will also be discussed in detail. Under the supervision of an experienced Authorized Nuclear Inspector Supervisor the participants have the opportunity to develop their own company's Written Practice.

Duration: 2 days

Key Points of the Workshop:

- presentation of the Recommended Practice No. SNT-TC-1A of the American Society for Nondestructive Testing ASNT
- determining the specific needs of the employer regarding the NDE personnel qualification levels depending on the NDE methods (e.g. RT, UT, MT, PT, VT, LT) applied at the manufacturing facilities
- determining if NDE personnel already qualified according to national or international central certification programs (e.g. DIN EN 473, DIN EN ISO 9712, ASNT, ACCP) can use their personal NDE Certificates for the purposes of their employer
- description of the NDE Levels of qualification including the requirements for the individual's education, initial qualification, and the required scope of training
- description of the written and practical examinations to be passed by the NDE personnel according to SNT-TC-1A
- description of the administration and grading of those exams including the certification requirements
- recertification process and technical performance evaluation according to SNT-TC-1A
- administration and retention of the required documentation to maintain the NDE personnel qualification
