

ASME Code Section V – NDE Procedures

Description: Starting with a brief general introduction into the ASME Code the participants will learn about the required content of NDE procedures according to ASME Code Section V. With the participants' active involvement a complete NDE procedure will be developed for one particular NDE method (RT, UT, MT, PT, VT, LT). An Authorized Nuclear Inspector Supervisor experienced in this field will assist the participants with this task.

Duration: 2 days

Key Points of the Workshop:

- discussing the specific NDE technique(s) (e.g. RT, UT, MT, PT, VT, LT) used by the employer
- description of the examination process
- description of the interpretation and evaluation of indications depending on the ASME Construction Code applied (ASME Section VIII-Div. 1 & 2, Section I, Section IV, etc.)
- final documentation required for the performed nondestructive examination NDE
